

Lokesh Yadav

📍 Gurugram, Haryana, India | ✉ lokesh.yadav1994@yahoo.com | ☎ +91-9599991739 | 🌐 [linkedin.com/in/ylokesh](https://www.linkedin.com/in/ylokesh)

PROFESSIONAL SUMMARY

Results-driven Software Developer with 3+ years of experience in Python, Java, SQL, and AWS, with a proven track record in building scalable data pipelines, automating reporting, and delivering actionable insights. Skilled in ETL development, API integration, and statistical data analysis, with hands-on expertise in cloud platforms (AWS S3, EC2) and visualization tools (Tableau, Power BI). Adept at collaborating with cross-functional teams to design robust solutions that improve efficiency and support data-driven decision-making in fast-paced environments. Passionate about leveraging technology to optimize healthcare processes and enhance patient outcomes.

TECHNICAL SKILLS

- **Programming:** Python (Pandas, NumPy), RAG, Lang Chain, Java (Core), SQL (Oracle, MySQL, PostgreSQL)
- **Data Engineering:** ETL Development, Workflow Orchestration (Airflow), Data Cleaning, API Integration
- **Cloud & DevOps:** AWS (S3, EC2), Kubernetes, Docker, GitHub Actions
- **Visualization:** Tableau, Power BI
- **Other Tools:** MS Excel, Arbutus Analyzer, ACL Analytics

PROFESSIONAL EXPERIENCE

Supervisor

Topper's Pizza | Ontario, Canada | Jan 2022 – June 2025

- Hired, trained, and led a team of 10+ employees, fostering a high-performance work culture.
- Designed efficient employee scheduling systems, reducing staffing conflicts and improving shift coverage.
- Implemented process improvements for inventory management, reducing waste and optimizing supply orders.
- Handled escalated customer issues with professionalism, ensuring consistent service quality.
- Collaborated with management to monitor KPIs and improve operational performance — transferable experience in team management and metrics tracking relevant to IT project delivery.

Data Analyst (Co-op - Trainee)

Source One Financial Corporation | Ontario, Canada (Remote) | Jan 2020 – Apr 2020

- Developed Python-based data processing scripts and SQL queries to clean, transform, and analyze structured datasets.
- Built and deployed an automated employee performance dashboard in Tableau, reducing reporting time by 40%.
- Utilized AWS S3 and RDS to manage and store data, supporting scalable analytics solutions.
- Collaborated with cross-functional teams to define KPIs and deliver actionable insights using ETL workflows and statistical models.

Big Data Analyst

Substratal Solutions Pvt. Ltd. | Gurugram, India | Feb 2018 – Jul 2018

- Designed and implemented ETL pipelines using SQL, Arbutus Analyzer, and early scripting in Python to streamline data ingestion and validation.
- Optimized large-scale data storage and processing with **AWS Redshift and S3**, improving query performance and scalability.
- Automated reporting workflows and initiated **scheduler-based jobs** (precursors to tools like Airflow), reducing turnaround time by 30%.
- Collaborated with development teams to prepare structured datasets for dashboards, supporting **Java-based backend services** for reporting APIs.
- Introduced reusable SQL templates and data workflows that improved reporting accuracy and consistency across client deliverables.
- Utilized AWS S3 and RDS to manage and store data, supporting scalable analytics solutions.

EDUCATION

Post Graduate Certificate – Business Management

Canadore College, Canada | 2020–2021 | Grade: 75%

- Coursework: **Project Management for IT, Business Case Analysis, Agile Processes for Software Development, Financial Modeling**

Post Graduate Certificate – Big Data Analytics

Georgian College, Canada | 2019–2020 | Grade: 80% | Dean's List

- Coursework: **Data Programming (Python, Java Basics), SQL & Data Manipulation, Data Visualization, Enterprise Analytics, Cloud-Based Big Data Systems**
- Capstone Project: Built a **Python + SQL pipeline** for processing employee data and deployed a Tableau dashboard with automated updates.

Bachelor of Engineering – Mechanical Engineering

Dronacharya College of Engineering, Gurugram, India | 2012–2016

- Relevant Modules: Engineering Mathematics, Statistics, Programming Fundamentals (C, Java), Database Basics

KEY PROJECTS & ACHIEVEMENTS

- ERIP – Easy REST API in Python:
 - Designed and implemented a Fast API-based framework to generate REST APIs dynamically using a simple front-end interface.
 - Users can define functions from the front end, and the backend automatically creates and deploys the APIs.
 - Integrated request validation, automated documentation (Swagger UI), and error handling for a production-ready solution.
- Demonstrates strong backend engineering, API design, and Python development skills.
- Employee Performance Analytics: Built a production-ready Tableau dashboard with a Python + SQL data pipeline.
- ETL Automation: Developed automated workflows (precursor to Airflow) reducing manual effort and improving accuracy.
- Cloud Data Solutions: Designed scalable data pipelines using AWS S3, and EC2.
- Recognition: Achieved Dean's List at Georgian College for academic excellence.
